

# Meridian IT Support & Infrastructure FAQ

Classification: General Employee Access • IT Operations Desk

---

## **Q: How do I connect to the internal corporate Wi-Fi?**

Connect to the SSID 'Meridian-Corp-Secure' using your corporate Okta Single Sign-On credentials. Device certificate enrollment is performed automatically via the IT provisioning portal.

## **Q: How do I access internal production staging environments?**

Production staging access requires connecting through the Meridian WireGuard VPN portal ([vpn.meridian-cloud.internal](https://vpn.meridian-cloud.internal)). Multi-factor authentication via Duo or Okta Verify Push is required on every 8-hour session lease.

## **Q: What is the corporate password policy?**

Passwords must be at least 16 characters in length and cannot match the previous 5 passwords. Enterprise accounts enforce 90-day rotation intervals unless FIDO2 WebAuthn hardware keys (YubiKey) are enabled.

## **Q: How do I contact the emergency IT desk?**

For urgent system outages or suspected security incidents, page the on-call team in Slack channel [#it-ops-urgent](#) or email [helpdesk@meridian-corp.internal](mailto:helpdesk@meridian-corp.internal) with priority HIGH.
